SUMMARY

Software Engineer with the passion for developing innovative programs that expedite the efficiency and effectiveness of organizational success. Well-versed in technology and writing code to create systems that are reliable and user-friendly. I have five (5) years of experience applying agile methods to continuously build usable SaaS apps, strong software engineering foundation acquired by studying for a bachelor's degree in Computer Science at the University of Cape Coast. Confident communicator, team player, strategic thinker, and innovative creator to develop software that is customized to meet a company's organizational needs, highlight their core competencies, and further their success.
